Quotation of block ice crusher machine

Product Description

Our block ice crusher machine (also known as ice block crusher, industrial ice crusher machine) is a versatile, heavy-duty crushing solution designed for commercial and industrial use. Built with a reinforced steel body and high-strength blades, this commercial ice crusher machine efficiently processes not only various forms of ice but also solid blocks like industrial salt, butter, and industrial wax. Whether you need fine snowflake ice or large chunks up to 6cm, this ice crusher machine delivers consistent results for diverse applications.

ICE CRUSHER MACHINE

High Efficiency / Durable / Easy to Clean

Stainless Steel High Efficiency Easy to Clean Durable & Reliable

WIDE APPLICATION

Seafood Display Cold Drinks Concrete Cooling Food Processing Medical & Lab Use

Quality, price, time and service is the tenet of our business.

Credit, reposal, negotiation and cooperation is our standard.

Raw Materials & Finished Products

- Raw Materials :** Block ice, tube ice, cube ice, dry ice, industrial salt blocks, butter blocks, industrial wax blocks
- Finished Products :** Fine snowflake ice, ice cubes, medium chunks, large pieces (up to 6cm), crushed salt/wax/butter pieces

Quality, price, time and service is the tenet of our business.

Credit, reposal, negotiation and cooperation is our standard.

Industrial Salt Blocks

Product Applications

This **ice crusher machine for business** is widely used across multiple industries:

- 1. Food & Beverage:** Seafood preservation, cold drink shops, cocktail bars, catering services, and food processing plants (crushing ice, butter blocks).
- 2. Fishing & Aquaculture:** Keeping seafood and fish fresh during transportation and storage.
- 3. Industrial Processing:** Crushing industrial salt, wax, and other solid blocks for chemical, pharmaceutical, and manufacturing processes.
- 4. Events & Catering:** Ice sculpting, outdoor events, and large-scale catering operations.
- 5. Cold Chain & Logistics:** Cold storage and transportation of perishable goods.
- 6. Laboratories & Research:** Processing ice and other materials for scientific experiments and testing.

Working Principle

This industrial ice crusher features a reinforced crushing chamber design and is equipped with an internal high-speed rotating blade system for operation:

Quality, price, time and service is the tenet of our business.
Credit, reposal, negotiation and cooperation is our standard.

1. Raw materials (such as ice blocks, salt blocks, etc.) can be fed into the machine via either a manual or an automated feeding system.

The high-speed rotating blades subject the raw materials to shearing, impact, and crushing forces, processing them into smaller fragments.

2. The machine is fitted with fixed blades that require no manual adjustment, enabling the stable production of crushed ice and ice chips ranging in size from 0 to 6 cm—a particle size range spanning everything from fine snowflake ice to large ice granules up to 6 cm.

3. The crushed material is discharged through the outlet, ready for immediate use or further downstream processing.

Product Features and Advantages

1.Multi-Size Output Adjustment: Crushes materials into ultra-fine snowflake-like ice, ice cube-sized pieces, or large chunks up to 6cm (egg size), meeting different production and usage needs.

2.Flexible Feeding Options: Available in manual feeding (block ice crusher machine manual) and automatic ice feeding versions, suitable for small workshops and large production lines alike.

3.Multi-Material Compatibility: Not just an ice crusher machine—it also processes industrial salt blocks, butter blocks, industrial wax, tube ice (ice tube crusher machine), cube ice (ice cube crusher machine), and even dry ice (dry ice crusher) for specialized applications.

4.Durable & Low-Maintenance Construction: Reinforced steel frame and heavy-duty wear-resistant blades ensure long service life, even with frequent, heavy use.

Quality, price, time and service is the tenet of our business.

Credit, reposal, negotiation and cooperation is our standard.

Skype:annieshuang1129

5.Wide Range of Sizes: From compact small ice crusher for small businesses to industrial-grade models for high-volume production.

6.Easy Operation & Cleaning: Simple structure design with quick disassembly for cleaning, plus low energy consumption for cost-effective daily use.

Cutting Tools

Different cutting tools can produce ice chips ranging from 0 to 6 cm in size, and are also compatible with materials such as industrial salt blocks.

Feed Inlet

Wide opening design, fits large ice blocks for easy feeding

Discharge Port

Designed for rapid discharge of ice shavings, facilitating easier collection.

Automatic Feeding Device

Equipped with an automatic feeding system, no manual handling needed, labor-saving and high efficiency

Customer Feedback

Runxiang Machinery real customer feedback! We offer customized stainless steel and carbon steel ice crushers for

Product Packaging & Shipping

1. Packaging

In order to ensure the safety of the product during transportation, we have adopted strict packaging measures. The main body of the equipment will be fully wrapped with high-strength plastic film to prevent erosion by dust, moisture, etc. during transportation, and to avoid damage due to collision during transportation.

**Quality, price, time and service is the tenet of our business.
Credit, reposal, negotiation and cooperation is our standard.**

In terms of overall packaging, the equipment will be loaded into a customized wooden box. The wooden box has a sturdy structure and is equipped with a special fixing device inside, which can firmly fix the equipment and prevent the equipment from shaking in the wooden box. At the same time, the name, model, weight, transportation precautions and other information of the equipment will be clearly marked on the wooden box, which is convenient for transportation and handling personnel to identify and operate.

2. Transportation

For international customers, sea transportation is mainly used. Before loading, the equipment will be strictly inspected and reinforced to ensure that the equipment is not damaged during long-term sea transportation. At the same time, we will cooperate with professional freight forwarding companies to handle relevant transportation procedures and insurance, and provide customers with one-stop transportation services, so that customers have no worries.

Company Introduction:

Zhengzhou Runxiang Machinery Equipment Co., Ltd. is an enterprise focusing on the research and development, production and sales of agricultural and food processing equipment. Over the years, it has been committed to providing customers with high-quality, high-performance equipment and perfect solutions. The company has a team of professional engineers, technicians and sales staff who have rich experience and expertise in their respective fields.

In terms of research and development, the company continues to invest a lot of resources, pays attention to the latest technology and market demand in the industry, and has established cooperative relations with many scientific research institutions and universities at home and abroad to jointly carry out technical research and product innovation. Through continuous efforts, the company has launched a series of advanced equipment with independent intellectual property rights.

In the production process, the company strictly follows the international quality management system, from the procurement of raw materials to the assembly and testing of products, every link is strictly controlled to ensure the stable and reliable quality of the products. The company has a modern production base and advanced production equipment, which can meet the customized needs of different customers for equipment.

Quality, price, time and service is the tenet of our business.
Credit, reposal, negotiation and cooperation is our standard.

COMPANY INTRODUCTION

How about after sales service:

After-sales service policy

1. After receiving payment from customers , sales should reconfirm the basic requirements of the machine configuration, voltage hertz, accessories and other basic requirements as soon as possible, and then send a purchase order to the workshop as soon as possible in order to save time of customers.
2. Make sure to keep the pictures before and after the packaging before shipping, and reconfirm whether the shipping list is consistent with the purchase order and the customer's needs.
3. After receiving the bill of lading, prepare the packing list and invoice for customs clearance and other customs clearance documents that the customer may need as soon as possible.
4. Every one week, two weeks and or one month (determined by the voyage), follow up the freight forwarder to check the latest route of the customer's cargo and inform the customer about the newest arrival time.
5. Please remind customers to bring customs clearance information to the freight forwarder to prepare for customs clearance ten days before the arrival of the goods.

Quality, price, time and service is the tenet of our business.

Credit, reposal, negotiation and cooperation is our standard.
